

Swedtool® Catalyst Dispenser

1 litre & ½ litre measuring equipment

The Swedtool Catalyst Dispenser has been specially designed to simplify the quick and repeated measurement of specific quantities of liquids. It has for example been found particularly useful for measuring catalysts in the G.R.P. industry, chemicals in laboratories and hospitals etc. The dispenser is very easy to use.

The hole in the colored tube is set to the required level of liquid volume according to the scale on the measuring glass. The bottle is then carefully pressed together and the liquid automatically fills the measuring glass to the desired level. In the event too much liquid is pressed up into the measuring glass, the correct level is automatically set once the pressure has ceased.

0-75 ml molded scale

— The lid on the measuring glass and the plug in the tube prevents splashing.

— Measuring glass: TPX - transparent, can cope with most types of liquids.

— Plastic Bottle: PE - semi-transparent, can cope with most types of liquids.

- Simple and safe to use
- Accurate measurement
- Handles most types of fluids
- Comes in two sizes

Dispensers			
Name	Art.no.	Shape	Tube Color
Catalyst Dispenser 1 litre	60-000101	Round	Orange
Catalyst Dispenser 1/2 litre	60-000100	Round	Orange
Catalyst Dispenser 1 litre	60-000110	Round	Black
Catalyst Dispenser 1/2 litre	60-000111	Round	Black
Catalyst Dispenser 1 litre	60-000112	Round	Blue
Catalyst Dispenser 1/2 litre	60-000113	Round	Blue
Catalyst Dispenser 1 litre	60-000114	Round	Green
Catalyst Dispenser 1/2 litre	60-000115	Round	Green
