

Swedtool® Fin Rollers Aluminum alloy with unique groove cutting properties

Swedtool fin rollers are produced in five different sizes and the corner roller is available with two bend lengths. The roller profiles are made from a special aluminium alloy with unique groove-cutting properties. The use of fin rollers produces less splashing from the plastic compared with the equivalent paddle rollers. 35/12S and 70/12S are delivered with brass ends. The larger diameters 70/30S and 140/22S are delivered with acetal ends, but can be obtained with brass ends on request.

Fin Rollers			
Name	Art no.	Width	Diameter
35/12S	50-000121	35 mm	12 mm
70/12S	50-000122	70 mm	12 mm
70/30S	50-000123	70 mm	30 mm
112/12S	50-000127	112 mm	12 mm
140/22S	50-000125	140 mm	22 mm
Corner Rollers			
11/40-300	50-000131	40 mm	7 mm
11/40-530	50-000132	40 mm	7 mm
